

Manufacturers of the famous

**KALSARA™**  
THE PERFECT CUTTING TOOL

## OUR APPROACH

Ensure optimum performance in the most demanding operating conditions.  
Manufacture tools to meet specific customer requirement.  
Dedicated technical staff in constant touch with the customer, assisting them to get performance from the tools. Offer competitive price to ensure low cutting cost.

## OUR STRENGTHS

- ☒ Quality consistency in every product
- ☒ Trained technical staff with more than 15 years of experience in tools & stone industries
- ☒ Stocks are ready for premium customers.
- ☒ Enquiry answered within two hours on emails.
- ☒ Advanced machinery for manufacturing tools.
- ☒ Close-co-ordination & technical back up for customer.

## ACHIEVEMENTS

- ☒ Life member of Centre for development of stones.
- ☒ Life member of All India granites & stones association.
- ☒ Priviledged member of Diamond tools association of India.
- ☒ Participated as an exhibitor in Stone Mart :2011 at Jaipur
- ☒ Participated as an exhibitor in Stona 2012 at Bangalore
- ☒ Regular visitor of Marmomacc fair at Verona, italy.
- ☒ Dedicated in manufacturing of tools this industries from past 19 years.

## ABOUT

### SANCHAYA IMPEX

Sanchaya Impex got started in 2010 as a trading firm in the field of supplying the best manufactured stone cutting tools for granite , marble , limestone also as a supplier of raw materials like synthetic diamond powder and cobalt used to make these tools.

Sanchaya Impex is based in Alwar, Rajasthan. Rajasthan as you all know is the heart of granite and marble mining and cutting industries

Sanchaya Impex is trading all the tools manufactured by its mother company Sharda

The Very Famous Brand Name KALSARA TOOLS belongs to Sharda Marble only.

### SHARDA MARBLE

It is the mother company of Sanchaya Impex

It was 1994 when a small manufacturing unit started with the name SHARDA MARBLE leading towards THE GOAL to provide stone industry with the best tools and raw materials ever.

The Manufacturing unit named SHARDA MARBLES is based in Matsya Industries Area, in Alwar. Location of SHARDA MARBLES impresses every visitor as it is surrounded with some of the top companies of India like Havells, Dabur India, Metso, Ashok Leyland, Saint Gobain, Parryware.

We specialize in the field of cutting tools used for granite, marble, sandstone cutting and we are one of the leading providers of raw materials used in manufacturing these tools. We service the needs of a variety of industries such as ceramics, stones, construction - from the smallest tools to giant tools.

We are ready to be the partner of choice for our customers through innovative products and providing quick services and expert advice. We believe in cost-effective solutions without sacrificing quality. Quality warranties and competitive pricing make us readily acceptable in the domestic and international markets.

Our extensive product line aims at offering value added solutions to improve your productivity and economy. By offering a wide selection of power tools and raw materials along with tools accessories, we view ourselves as a complete solution provider.

## DIAMOND WIRE

### QUARRY WIRE

#### GRANITE QUARRY

Wire for granite sawing comprises of wire saw beads inserted in a cable and coated with plastic or vulcanized rubber, it is water cooled and a safer way of using diamond wire as the beads remain in place in eventuality of breaking of the cable. The Diameter of Diamond wire saw is from 7.5mm to 11.5mm

#### MARBLE QUARRY

Similarly as Granite Quarry, the company also manufactures marble quarry

The wires are very efficient for quarrying purposes, having very less breakage ratio while using therefore increasing the working lifetime.

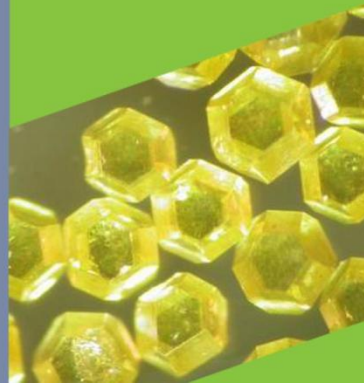

Their Automatic production ensures stable quality performance.

In addition, are safe, highly efficient and environment protecting.

### MULTI WIRE

We are one of the leading manufacturers and suppliers of Multiwires that are designed to slit the materials and are available for heavy duty applications. These wires are manufactured in compliance with the global quality standards and consist of diamond saw beads that are used for cutting different products.

Multi-wire saw works in high efficiency and little pollution. There is no tapered slab or chipping during processing that allows minimized waste and high stone yield.

### BLOCK SQUARING AND PROFILING WIRE

The diamond wires for profiling machines are used for cutting of complex shapes for building and gravestones, exploiting the profiling accuracy and the cutting quality of the diamond wire.

Taking advantage of high technology, we manufacture a complete line of wires for block squaring, which prove to be ever more efficient, both for the high cutting speeds and for long life.

# BLADES AND SEGMENTS

## BLADES

Sanchaya Impex are pioneers in production of diamond circular saw blades. Our blades provide the client with optimal performance and features.

Our blades are known for being highly productive, permitting lesser number of machines;  
The blades give straight cuts, which reduces the subsequent machining costs.  
A longer life lessens the downtime for re-tipping;  
The core life is longer.

## CONTACT

## SEGMENTS

Segment is the main part of diamond tools, and we provide diamond segments for cutting granite, marble, sandstone, limestone, and other stone cutting applications. Our diamond segments work very efficiently, specially on granite & marble. The diamond saw segment is available according to the customer's requirements. We aim to improve the diamond segments cutting efficiency meanwhile reducing the cost

## BEADS

The Wire Saws beads manufactured by us are known for their performance and quality. These products are rigid in construction, dimensionally accurate, maintenance free and make the working process easier to carry out. In addition to manufacturing wires, we can also provide beads on client's request
